

High Speed HDMI® Cable Professional

High Speed HDMI® cable with Ethernet, Plug/Plug, 2 Ferrites

Item Description:

The high-quality Zignum HDMI connecting cables are the perfect addition to your high-tech equipment. Thanks to triple-shielding as well as two absorber ferrite cores (EMI) and gold-plated contacts, data loss during transmission is largely minimised. Furthermore, the cables have an additional HDMI Ethernet channel (HEC) for a network cable connection. The connectors are shielded and sealed. In addition, thanks to a rugged nylon coating, the cable offers highly effective kink protection. This makes the Zignum HDMI cables highly flexible and ready for anything that may come their way. The cable supports Audio Return Channel (ARC), Automatic Content Enhancement (ACE), Deep Colour, 3D via HDMI, up to 2160p, HDMI 2K x 4K, Multichannel Surround Sound 5.1 and 7.1, and data streams of up to 340MHz can be transported without errors. The supplied dust caps reliably protect the ends, including against scratching.

Specifications:

- 19 pole HDMI connector on 19 pole HDMI connector
- 24 carat gold-plated contacts
- Triple shielding
- 2 absorber ferrite cores
- Audio return channel (ARC)
- Automatic Content Enhancement (ACE)
- Network cable (HEC)
- Multichannel Surround Sound 5.1 and 7.1
- 3D via HDMI, Deep Colour
- Supports ULTRA HD up to 2160p 2K x 4K
- ATC, RoHS, DPL, CE certified
